

# Point density at Maungatautari

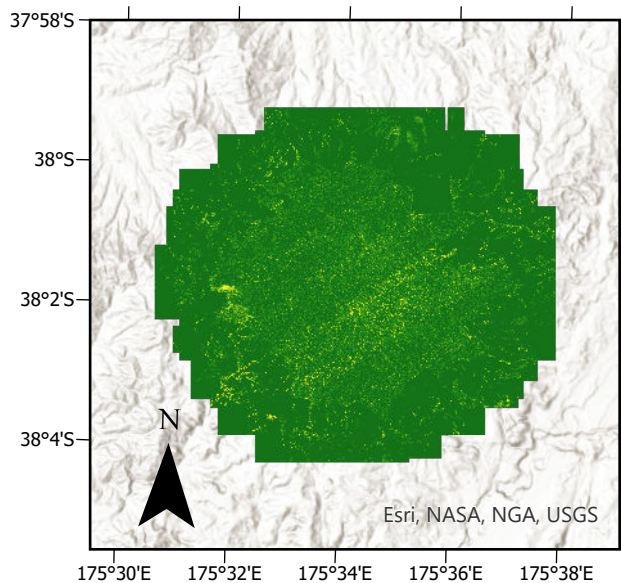

POINT DENSITY AT 0 - 0.5m

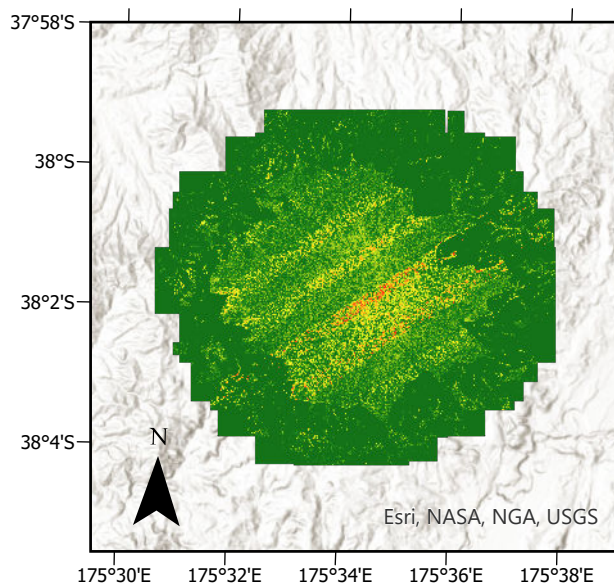

POINT DENSITY AT 0.5 - 2M

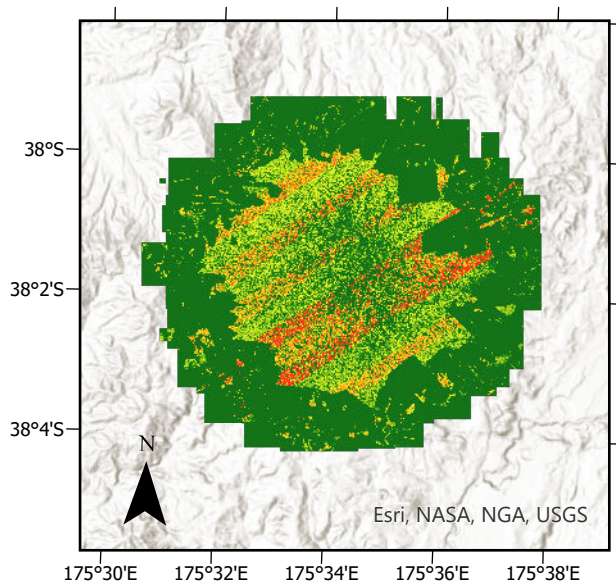

POINT DENSITY AT 2 - 5M

POINT DENSITY AT 5 - 10M

POINT DENSITY AT 15 - 30M

## Point density (per meter square)

0.1 - 0.2	9.7 - 11.4
0.3 - 2.1	11.5 - 13.3
2.2 - 3.9	13.4 - 15.2
4 - 5.8	15.3 - 17.1
5.9 - 7.7	17.2 - 18.9
7.8 - 9.6	19 - 51.7

### Comment:

The result may not truly reflect the bush density at different level as laser may not be able to penetrate through thick bushes to a low level ( especially below 5M) .  
Stripes with higher than average density was observed and believed to be the overlapping area of laser scanning results in a higher point density.
